

Lars Bytecraft

„I’m looking for a site where I can quickly find high-quality 3D printing templates that match my needs at a reasonable price.“

AGE	20
OCCUPATION	IT-Student
STATUS	Single
LOCATION	Netherlands

Quality conscious
and price-aware

Skilled with
technology

Learns things
independently

Detail-oriented
/efficiency-driven

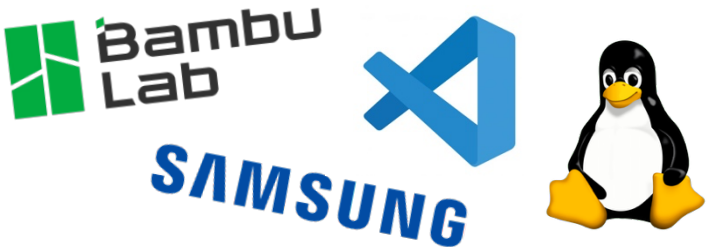

Bio

Lars Bytecraft is a 20-year-old IT student from the Netherlands who is deeply engaged in technology and digital creation. In his free time, he actively works with his 3D printer, designing and printing his own models, while also developing personal software projects to continuously improve his skills. He prefers creating things rather than buying ready-made-products, only relying on online shops for highly specialized or complex design.

Technology

Brands

Frustrations

- Poor navigation and unclear website structure
- Weak search and filtering functionality
- Limited product variety
- Overly complex or distracting design

Goals

- Find high-quality and reasonable priced products or templates
- Access highly specific and unique 3D models
- Easily customize designs (colors, materials)
- Fast and intuitive website
- Ensure compatibility of templates with different materials and printers
