Lars Bytecraft

„I'm looking for a site where I can quickly find high-quality 3D printing templates that match my needs at a reasonable price.“

AGE	20
OCCUPATION	IT-Student
STATUS	Single
LOCATION	Netherlands

Quality conscious and price-aware

Skilled with technology

Learns things independently

Detail-oriented /efficency-driven

Bio

Lars Bytecraft is a 20-year-old IT student from the Netherlands who is deeply engaged in technology and digital creation. In his free time he activly works with his 3D printer, designing and printig his own models, while also developing personal software projects to continously improve his skills. He prefers creating things rather than buying reafdy-made-products, only relying on online shops for highly specialiszed or complex design

Frustrations

- Poor naviagation and unclear website structure
- Weak search and filtering functionality
- Limited product variety
- Overly complex or destracting design

Goals

- Find high-quality and reasonable priced products or templates
- Access highly specific and unique 3D models
- Easily customize designs (colors, materials)
- Fast and intuitive website
- Ensure compatability of templats with different materials and printers
